

As **WRITERS** we will be looking at fantasy stories. This will involve contrasting reality and imagination before going on to write our own fantasy passages.

As **SCIENTISTS** we will be looking at animals and their habitats. We will look at their adaptations that allow them to survive and compare hot and cold habitats.

In **D&T** and **SCIENCE** we will be focusing on food technology. We will study the different food types and balanced diets before making our own food, which in keeping with the topic, will be following instructions to cook food and then to create frozen smoothies.

As **LINGUISTS** we will be looking at features of the English language such as nouns, adjectives and conjunctions. Year 2 will be focusing on suffixes a lot this term.

In **PE** we will be staying inside and looking at dance, tying this in with our favourite fantasy story- the Gruffalo.

**IN THE NEWS**

**THE ARTS**

**COMMUNICATION**

**PAPERLESS MATHS**

We will watch the news every Friday afternoon and discuss what has been happening.

With another rumoured cold spell coming up, we will be looking at the weather forecast on the news and linking it to map work and our hot and cold topic.

We will be looking to recreate habitats using different materials including mod-rock and collating real life materials.

The children will decorate these accordingly to create a range of environments from hot and cold parts of the world.

With Class 2 cooking this term, there will be a focus on the quality of instruction reading and writing.

Children will be encouraged to be clear in their instructions and equally as accurate in following them.

With the term's focus looking at hot and cold, Class 2 will have a focus on measuring temperature at different times and in different places.

As ever, we will link back to our Times Table Rockstars to help hone our multiplication skills.
